INTRODUCTION

We are pleased to provide the 2022 **Value Formulary** as a useful reference and informational tool. This document can assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This document is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the document is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at <https://www.ahrq.gov/gam/>, on the websites listed under each therapeutic class and on the sites listed in the Websites section of this publication.

PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

Drugs represented in this document may have varying cost to the plan member based on the plan's benefit structure. Some prescription benefit plan designs may alter coverage of certain products or vary copay amounts based on the condition being treated. Generic medications typically are available at the lower cost, brand-name medications on the document will generally cost more than generics. Generics should be considered the first line of prescribing subject to applicable rules.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Employees with significant clinical expertise are invited to meet with the P&T Committee, but no CVS Caremark employee may vote on issues before the P&T Committee. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, examples are noted below. The general principles shown in the examples can usually be extended to other entries in the document. Any exceptions are noted.

Listed products on the document generally include all strengths and all oral dosage forms of the cited product.

escitalopram *Lexapro*
Oral tablets, oral solution and all strengths of Lexapro would be included in this listing.

Nasal sprays require a separate entry.

sumatriptan nasal spray *Imitrex*

Oral disintegrating tablets require a separate entry.

prednisolone sodium phosphate orally disintegrating tabs *Orapred ODT*

Injectable dosage forms require a separate entry.

sumatriptan inj *Imitrex*

When a strength or dosage form is specified, only the specified strength and dosage form is on the document. Other strengths/dosage forms, including injectable dosage forms of the reference product are not.

gabapentin caps, tabs *Neurontin*
The capsule and tablet formulations are listed on the document, but the oral solution is not.

Extended-release and delayed-release products require their own entry.

tofacitinib *Xeljanz*
The immediate-release product listing of Xeljanz alone would not include the extended-release product Xeljanz XR.

tofacitinib ext-rel *Xeljanz XR*
A separate entry for Xeljanz XR confirms that the extended-release product is on the document.

Dosage forms on the document will be consistent with the category and use where listed.

nystatin
The above *nystatin* entry listed in the TOPICAL/DERMATOLOGY section is limited to the topical dosage forms. From this entry the oral formulations cannot be assumed to be on the list unless there is an entry for this product in the ANTI-INFECTIVES section of the document.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. **Boldface type** indicates generic availability. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product to the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the

brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.

- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

SPECIALTY MEDICATIONS

A new, rapidly growing category of drugs, specialty medications are the result of continued advances in drug development technology and design. They are created to target and treat complex chronic or genetic medical conditions and include bioengineered proteins, blood-derived products and complex molecules. The therapeutic categories listed below include products that are covered as part of the Specialty benefit.

| | |
|---|-------------------------------------|
| Acromegaly | Mental Health Conditions |
| Alpha-1 Antitrypsin Deficiency | Miscellaneous |
| Amyloidosis | Movement Disorders |
| Anemia | Multiple Sclerosis |
| Asthma | Neutropenia |
| Atopic Dermatitis | Ocular Disorders |
| Cardiac Disorders | Oncology - Injectable |
| Coagulation Disorders | Oncology - Oral/Topical |
| Cryopyrin-Associated Periodic Syndromes | Osteoporosis |
| Cystic Fibrosis | Paroxysmal Nocturnal Hemoglobinuria |
| Electrolyte Disorders | Phenylketonuria |
| Gastrointestinal Disorders-Other | Pre-Term Birth |
| Gout | Psoriasis |
| Growth Hormone & Related Disorders | Pulmonary Arterial Hypertension |
| Hematopoietics | Pulmonary Disorders - Other |
| Hemophilia, Von Willebrand Disease & Related Bleeding Disorders | Rare Disorders - Other |
| Hepatitis | Renal Disease |
| Hereditary Angioedema | Respiratory Syncytial Virus |
| HIV Medications | Rheumatoid Arthritis |
| Hormonal Therapies | Seizure Disorders |
| Immune Deficiencies & Related Disorders | Sickle Cell Disease |
| Infectious Disease - Other | Sleep Disorders |
| Inflammatory Bowel Disease | Systemic Lupus Erythematosus |
| Iron Overload | Thrombocytopenia |
| Lysosomal Storage Disorders | Transplant |
| | Urea Cycle Disorders |

Specialty Guideline Management (SGM)

SGM is our utilization management program that helps ensure appropriate utilization for specialty medications based on currently accepted evidence-based medicine guidelines. The utilization management program is available for therapeutic areas dispensed by our specialty pharmacies. SGM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Medications which may be included in the SGM program are identified in the document as “SP” for your reference. For additional information, please refer to [CVSspecialty.com](https://www.cvs.com/specialty) or to submit a prior authorization, please call 1-866-814-5506.

PLAN DESIGN

The document represents a closed formulary plan design. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical

necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

Individual pharmacy benefit plans may impose restrictions or not reimburse some products. In addition, over-the-counter (OTC) products, with the exception of insulin and diabetes monitoring products, are usually not included in the pharmacy benefit. If covered in the pharmacy benefit, OTC products require a valid prescription.

Log in to [Caremark.com](https://www.caremark.com) to check coverage.

PREVENTIVE SERVICES

The U.S. Department of Health and Human Services (HHS) has adopted Guidelines for Preventive Services under the Affordable Care Act (ACA). Under the ACA, some pharmacy benefit plans may provide a range of preventive services for \$0 member cost share. These items may include:

- Aspirin to Prevent Cardiovascular Disease
- Bowel Preparations for Colorectal Cancer Screening
- Fluoride Supplementation in Children
- Folic Acid Supplementation
- Tobacco Use Counseling and Cessation Intervention
- Immunizations
- Medications for Risk Reduction of Primary Breast Cancer
- Contraceptives
- Statin Use for the Primary Prevention of Cardiovascular Disease in Adults

Items that may be covered as preventive services under this formulary will not be specifically noted since final coverage is determined by the plan sponsor. For additional information regarding preventive services, please refer to <https://www.hhs.gov>

LEGEND

| | |

OPIOID ANALGESICS

Practice Guidelines for Cancer Pain Management (includes WHO analgesic ladder) are available at:
<https://www.asahq.org>
<https://www.nccn.org>

Opioid guidelines in the management of chronic non-malignant pain are available at:
<https://www.asipp.org/ASIPP-Guidelines.html>

The quantity of opioid products prescribed (including those that are combined with acetaminophen, aspirin or ibuprofen) will be limited to up to 90 morphine milligram equivalents (MME) per day based on a 30-day supply. Members who are opioid-naïve will be required to use an immediate-release (IR) formulation before moving to an extended-release (ER) formulation and will be subject to quantity limit restrictions.
